Instalación

Como instalar el modulo

Subir por FTP el modulo a la carpeta Modules de nuestra instalación de prestashop.

El modulo aplica permisos automáticamente a los archivos. Pero si su servidor no lo permite, hágalo manualmente. Aplicar permisos 777 en la carpeta del modulo a los archivos

aquaslider.tp
Slides.css
slides(folder)

Por ultimo, vamos al administrador de prestashop, a módulos e instalamos el modulo Aqua Slider

Configuración del modulo

Al configurar el modulo, tenemos acceso a muchas opciones, que nos permitirán modificar el aspecto de nuestro slider.

Enlaces

Settings

Add a new slide

Title:

Description:

URL:

Open in a new window:

Order:

ID product:

Transition: squareOutMoving

Picture: No se elig...n archivo

Desde esta opción agregamos los slider. Los mismos deben tener Título, descripción, url del enlace, si vamos a abrirlo o no en una nueva ventana, el orden de aparición (numérico) y la imagen.. Podemos especificar el tipo de transición de cada imagen. Si deseamos, podemos poner el ID de un producto, y el modulo mostrara la imagen del mismo junto con la imagen que subamos.

Si no colocamos titulo y descripción, el modulo cargara automáticamente el nombre y descripción del producto.

Items

ID	Text	Order	Description	URL	ID product	Actions
1	test	1 ▲▼	htt	http://www.test.ar	5	  
3	the slide	1 ▲▼	slide	http://www.rsi-sistemas.com.ar	4	  

Esta opción nos lista los slides. Podemos modificarlos con el botón de acciones, borrarlo o cambiar el orden con las flechas arriba y abajo.

Opciones

Settings

Slider Width: 550

Slider Height: 220

Product image Width: 130

Opacity: 0.9

Delay: 3 000

Slices: 7

Font size: 15

Title color: 2b2b2b

Description color: 1f1f1f

Price color: ff0000

Font family: Arial Black, Gadget, sans-serif

Background color: ffffff

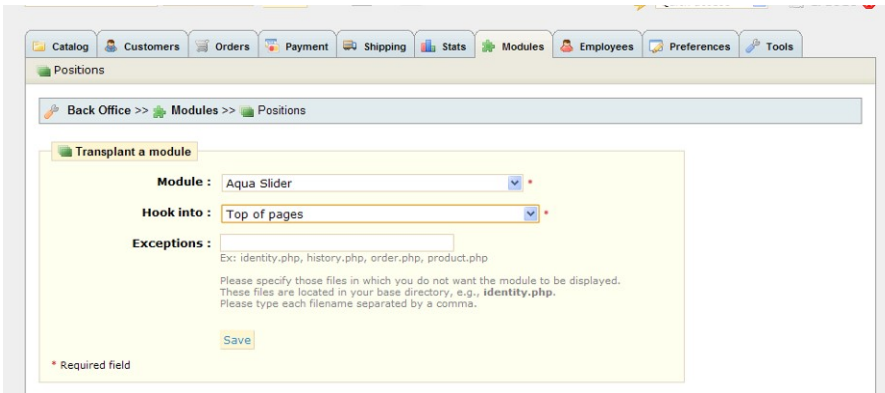

[Update](#)

Desde aquí configuramos las opciones del funcionamiento del slider:

- Ancho y alto: Es el ancho y alto del slider. Todas las imágenes deben ser del mismo tamaño para evitar espacios en blanco.
- Slices: Cantidad de barras laterales para la animación
- Fuente: Configuración de color, tamaño y letra de el titulo y descripción
- Color de fondo: Color de fondo de la descripción
- Imagen de producto: Tamaño de la imagen del producto.
- Retraso: Duración de la animación (en milisegundos)

Transplantar el modulo: Podemos colocar el modulo en el header de nuestro template. Para esto vamos a modulos -> posiciones -> transplantar un modulo y seleccionamos Aquaslider y en Top

Tendremos que removerlo de Home para evitar conflictos. Por ultimo, el modulo debe aparecer ultimo en el Top

Top of pages - 8 modules [A hook which allow you to do things a the top of each pages.]

Installation

How to install the module

Upload via FTP the modulo to the folder Modules prestashop our facility.

The module automatically apply permissions to files. But if your server does not allow it manually. Apply permissions 777 on the folder to the files module

aquaslider.tp
Slides.
slides(Folder)

Css

Finally, we prestashop administrator to modules and install the module Aqua Slider

Configuration module

When you configure the module, we have access to many options, which can alter the look of our slider.

Links

The screenshot shows a 'Settings' configuration window with a yellow background. At the top left is a 'Settings' tab with a monitor icon. Below it is a button labeled 'Add a new slide'. The form contains the following fields: 'Title:' (text input), 'Description:' (text area), 'URL:' (text input), 'Open in a new window:' (checkbox), 'Order:' (text input), 'ID product:' (text input), 'Transition:' (dropdown menu with 'squareOutMoving' selected), and 'Picture:' (file selection button labeled 'Seleccionar archivo' and 'No se elig...n archivo'). At the bottom are two buttons: 'Add this slide' and 'Edit this slide'.

From this option, add the slider. They must have title, description, link url, if we are open or not in a new window, the order of appearance (numeric) and the picture .. You can specify the type of transition of each image. If we wish, we can put the ID of a product, and the unit will display the same image with the image we raise.

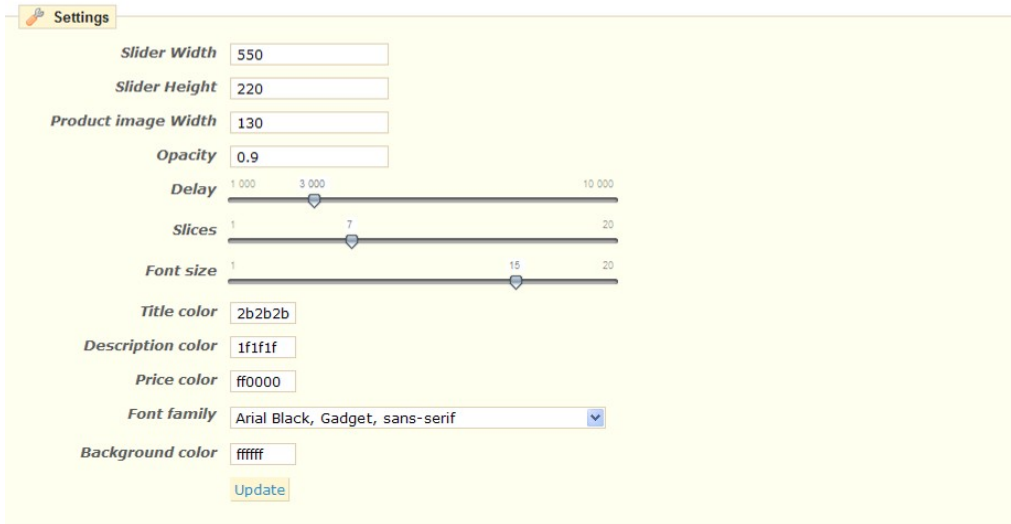

If you do not put title and description, the module automatically loaded the product name and description.

Items

ID	Text	Order	Description	URL	ID product	Actions
1	test	1 ▲▼	htt	http://www.test.ar	5	 
3	the slide	1 ▲▼	slide	http://www.rsi-sistemas.com.ar	4	 

This option lists the slides. We can modify the action button, delete or change the order using the up and down.

Options

The image shows a settings panel for a slider widget. It includes the following controls:

- Slider Width:** Input field with value 550.
- Slider Height:** Input field with value 220.
- Product image Width:** Input field with value 130.
- Opacity:** Input field with value 0.9.
- Delay:** Slider with values 1 000, 3 000, and 10 000. The current value is approximately 3 000.
- Slices:** Slider with values 1, 7, and 20. The current value is 7.
- Font size:** Slider with values 1, 15, and 20. The current value is 15.
- Title color:** Input field with value 2b2b2b.
- Description color:** Input field with value 1f1f1f.
- Price color:** Input field with value ff0000.
- Font family:** Dropdown menu with value Arial Black, Gadget, sans-serif.
- Background color:** Input field with value ffffff.
- Update:** Button.

From here you configure the operation of the slider options:

- Width and Height: The width and height of the slider. All images must be the same size to avoid white space.
- Slices: Number of sidebars to the animation
- Source: Set color, size and letter of the title and description
- Background color: Background color of description
- Product Image: Size of product image.
- Delay: Length of animation (in milliseconds)

module de configuration

Lorsque vous configurez le module, nous avons accès à de nombreuses options, qui peuvent modifier l'apparence de notre curseur.

Liens

Settings

Add a new slide

Title:

Description:

URL:

Open in a new window:

Order:

ID product:

Transition: squareOutMoving

Picture: No se elig...n archivo

A partir de cette option, ajoutez le curseur. Ils doivent avoir le titre, description, URL du lien, si nous sommes ouverts ou non dans une nouvelle fenêtre, l'ordre d'apparition (numérique) et de l'image .. Vous pouvez spécifier le type de transition de chaque image. Si nous voulons, nous pouvons mettre l'ID d'un produit, et l'appareil affiche la même image avec l'image que nous soulevons.

Si vous ne mettez pas le titre et la description, le module chargé automatiquement le nom du produit et la description.

Articles

ID	Text	Order	Description	URL	ID product	Actions
1	test	1 ▲▼	htt	http://www.test.ar	5	  
3	the slide	1 ▲▼	slide	http://www.rsi-sistemas.com.ar	4	  

Cette option donne la liste des diapositives. Nous pouvons modifier le bouton d'action, supprimer ou modifier l'ordre en utilisant le haut et le bas.

Options

Settings

Slider Width

Slider Height

Product image Width

Opacity

Delay 1 000 3 000 10 000

Slices 1 7 20

Font size 1 15 20

Title color

Description color

Price color

Font family

Background color

De là, vous configurer le fonctionnement des options curseur:

- Largeur et Hauteur: La largeur et la hauteur du curseur. Toutes les images doivent avoir la même taille pour éviter l'espace blanc.
- Tranches: Nombre de barres latérales de l'animation
- Source: Définir la couleur, la taille et la lettre du titre et la description
- La couleur de fond: La couleur de fond de la description
- Product Image: Taille de l'image du produit.
- Délai de livraison: Durée de l'animation (en millisecondes)

Le repiquage du module: Vous pouvez placer le module dans l'en-tête de notre modèle. Pour cela, nous allons modules - Position> -> transplantation d'un module et sélectionnez AquaSlider et Top. Nous allons devoir l'enlever de la maison à éviter les conflits. Enfin, le module doit figurer en dernier dans le Top
